

Colombia – Physical Supply

On the Caribbean side of Colombia, Lindsay Blee can supply via barge and truck in Cartagena and Mamonal (as bunkers only for Covenas). Crucial locations for Colombia's containerised cargo and energy trade. We can also supply via truck in Santa Marta and Barranquilla, two key locations for the bulk shipping trade.

Our straight run product is sourced from a purpose built shoreside Refinery optimised for marine fuels and supplied on two double-hull barges.

Buenaventura is Colombia's largest port on the Pacific coast.

The port serves as a key maritime gateway for Colombian trade with Asia, North America and the Pacific Rim.

Lindsay Blee can make supplies via truck and barge alongside.
